

Stop Solution for ELISA, 30 mL

(0.45M sulphuric acid solution)

REF #: AR019B

For In vitro Laboratory Use Only

DESCRIPTION

Stop Solution contains 0.45M sulphuric acid in 30 mL of a ready to use solution.

CAUTION: Sulphuric acid reacts caustically, even when diluted to 0.45M. It is therefore recommended to handle this solution with great care. Avoid any contact with skin and eyes, and wear protective glasses and gloves when handling.

H290: May be corrosive to metals.

APPLICATION

This solution is used for stopping the colour development step in an ELISA application. 50 µL of Stop Solution are recommended per 200 µL of ELISA reactive milieu.

STORAGE AND STABILITY

- 2°C to 8°C
- Can be used until the expiration date printed on the bottle
- Opened vials can be used within 4 weeks, if they are closed after each use and protected from any contamination

HAZARD WARNING

- For in vitro use only
- This solution contains sulphuric acid (0.45 M)
